Bed Docker

The Bed Docker shall be a U.L. listed pre-manufactured assembly and shall provide "docking" location for the patient bed with electrical devices on each side. These devices shall be as shown on the contract drawings. The Bed Docker shall transfer the impact load of the bed from the Kydex™ cover to the Rough-In Housing to the Rough-In Template and to the internal stud wall.

KYDEX™ COVER

The Bed Docker shall include a single piece, high impact Kydex™ 100 cover. The Kydex™ cover shall be .125" thick and provide pre-punched knockouts for electrical service locations. The color of the Kydex™ cover shall match Formica #923 "surf" and mount over the rough-in housing.
